

ALBERT CHESTER CASIA

Web Designer/Graphic Designer

I'm Chester, a freelance web developer and designer based in the Philippines.

I am passionate about building responsive, high-performing web applications that pair clean code with seamless user experiences. I focus on intuitive site architecture, crisp layouts, and scalable solutions that help modern businesses stand out online.

As a web developer, my work centers on translating creative designs into reliable, fast-loading digital products. Modern web technologies make up the core of my stack, giving clients complete ownership over their digital platforms and the flexibility to scale as their business

My Experiences

Tribute Technology Inc.
(2023 - present)

Web Designer / Web Implementer / Frontend Developer

- Designed and implemented responsive website layouts for funeral homes and memorial service providers using HTML, CSS, JavaScript, Bootstrap, and templating systems.
- Customized website themes to align with client branding while maintaining accessibility and responsive design standards.
- Collaborated with project managers, developers, and content teams to deliver high-quality websites within project timelines.
- Created and updated landing pages, memorial pages, obituary layouts, and service information pages.
- Optimized websites for performance, cross-browser compatibility, and mobile responsiveness.
- Maintained and enhanced existing websites by implementing design improvements, fixing layout issues, and updating content.
- Integrated client-provided images, branding assets, forms, and multimedia into website designs.
- Customized website themes to align with client branding while maintaining accessibility and responsive design standards.
- Collaborated with project managers, developers, and content teams to deliver high-quality websites within project timelines.
- Created and updated landing pages, memorial pages, obituary layouts, and service information pages.
- Optimized websites for performance, cross-browser compatibility, and mobile responsiveness.
- Maintained and enhanced existing websites by implementing design improvements, fixing layout issues, and updating content.
- Integrated client-provided images, branding assets, forms, and multimedia into website designs.
- Performed quality assurance testing to ensure consistent functionality and user experience across devices and browsers.
- Worked with version control systems and content management tools to manage website updates efficiently.
- Assisted in troubleshooting front-end issues and implementing UI/UX enhancements based on client feedback.
